

Press Release

RE: Birkin Cars USA production

Due to the unstable political and business conditions in South Africa, **Birkin Performance Cars**, the South African **Birkin International** licensee has ceased manufacturing operations.

To enable the continued production of cars and replacement parts necessary to support current and future customers, **Birkin International** has amended the license agreement with **Birkin Direct-USA** to include **production in the USA**. To accommodate this, selected tooling and production jigs are being prepared for shipment to **Birkin Direct-USA**.

Birkin International is currently in negotiation with European companies to accommodate additional production facilities.

Please contact **Tom Carlin - Birkin Direct-USA** for further information and any parts or new car needs.
